Karnav Pargi

Software Developer

About Me

I have been a full-time Software developer since June-2017. I first encountered a commercial project based on JavaScript in 2017. In January 2018 I started working as a NodeJS developer. From Jan-2018 to Aug-2019 we have successfully deployed 4+ projects based on NodeJS, ExpressJS, MongoDB. In Sept-2019 I got the opportunity to work with ReactJS, NodeJS, MySQL for 3+ months. from March-2020 to present I have worked with Angular, NodeJS, MySQL, KnexJS.

EXPERIENCE

MEAN Stack Developer
Ahmedabad, India

~2 Years Experience
Software Developer, Ahmedabad, India
from SEP-2019 - present.

NodeJS Developer
Ahmedabad, India

1.7+ Years Experience
FrontEnd Engineer Level-1, Ahmedabad, India
from JAN-2018 - SEP-2019.

JavaScript Developer
Ahmedabad, India

6+ Months Experience
JavaScript Developer, Ahmedabad, India
 from JUNE-2017 - DEC-2017.

SKILLS

Back-End
1. JavaScript
2. Node.JS
3. ExpressJS

Front-End*:
1. Javascript
2. ReactJS*
3. Angular 9

Back-End Javascript Frameworks & Libraries:
1. NodeJS
2. mongoDB(mongoose)
3. Javascript
4. Socket.IO
5. MySQL(knexJS, sequelize)

Container Platform:
1. Docker*

Development Tools:
1. VS Code

Server Side Language:
1. NodeJS
2. ExpressJS
3. NestJS

Database:
1. MongoDB
2. MySQL
3. Redis

Operating Systems
1. Ubuntu(Linux)
2. Mac

3. Windows

Version Control Tools
1. CoinPayments
2. Braintree By Paypal
3. **Stripe**
4. [MCB (mauritius corporation bank)](MCB)

Version Control Tools
5. GIT

Project Tracking Tools
1. Trello
2. Github

Project Management Methodologies
1. Scrum methodology.

PROJECTS PORTFOLIO

JetPackED

Product: A data analytics tool.

Technologies: NodeJS, MySQL, Angular 9

Role: Software Developer

Duration: MAR-2020 to present

Project Description:

Designed asset tracking and management to manage devices like mobiles, laptops, computers, TV and many more. This is a flexible and customizable system in the industry for tracking and managing your assets.

following features :
- Asset Management
- Keep track of assets

Redprint.app and Revivn

Product: Cloud based asset management tool.

Technologies: NodeJS, MySQL, ReactJS

Role: MERN Stack Developer

Duration: SEP-2019 to MAR-2020

Project Description:

Designed asset tracking and management to manage devices like mobiles, laptops, computers, TV and many more. This is a flexible and customizable system in the industry for tracking and managing your assets.

following features :
- Asset Management
- Keep track of assets

CPMS (Computerized Predictive Maintenance System)

Product: CPMS (Yacht maintenance)

Technologies: NodeJS, MongoDB, Express.js, Angular 6

Role: NodeJS Developer.

Duration: AUG-2018 to AUG - 2019

Project Description:

CPMS is a maintenance system for Yachts. An Enterprise planning solution based on Angular and Node Technologies to track and handle the maintenance ,defects, parts, equipment, assets etc. One can also generate a report for the maintenance created as per the assets.

following features :
- Auto generated maintenance tasks of Yachts when they docked.
- Manage resources
- Time based predictive maintenance tasks.
- Month wise report Summary.
- Defects logging and reports.

Loveternational (Dating App)

Product: Loveternational app

Technologies: Nodejs, MongoDB, Express.js, Android, IOS

Role: NodeJS Developer

Payment Gateway: Braintree

Duration: JUNE-2018 to AUG-2018.

Project Description:

Loveternantional is an App for Singles or divorced persons who are looking for a perfect marriage mate. They come to this app and register themselves. Once they get someone perfect, they can find attorneys who are already registered on this site. They help couples get married.

following features :
- Find For Perfect life Partner
- Select Attorney to get married.
