FINAL YEAR PROJECT

Name   : Bug Tracking System

Front-End   : AngularJS, HTML5, W3CSS

Backend   : NodeJS, ExpressJS

Database   : MongoDB

Description   : Bug Tracking System is an ideal solution to track the bugs of a product, solution or an application. Bug Tracking System allows individual or groups of developers to keep track of outstanding bugs in their product effectively. This can also be called as Defect Tracking System .The Bug Tracking System can dramatically increase the productivity and accountability of individual employees by providing a documented workflow and positive feedback for good performance.
